

# Developing Minds

## Do you know this student?

*"He kept saying, 'I'm trying my hardest.'"*

*"She needs a lot of structure."*

*"He gets so far behind the class, he just gives up."*

**This groundbreaking multimedia library helps you understand how each student learns and provides tools and strategies to address differences in learning so all your students can be more successful in school—and in life.**

# Are some students a mystery to you?

**No matter what you try and how much extra time you spend with them, these students still struggle to succeed in school. They have difficulty with reading or other subjects, lose homework, or have trouble focusing. You need solutions before they begin to lose hope, feel bad about themselves, or become behavior problems.**

**Your students do not have to struggle needlessly. All children have differences in the ways they learn. *Developing Minds* offers key strategies to support all students' learning differences, address specific learning challenges, and provide a common language for effective home and school communication.**

The *Developing Minds* multimedia library features the work of All Kinds of Minds, a private non-profit institute affiliated with the University of North Carolina at Chapel Hill. All Kinds of Minds offers a broad range of programs and resources that enable parents, educators, and clinicians to help children and adolescents with differences in learning achieve success in school and life. The Institute was co-founded by **Dr. Mel Levine**, who for more than 25 years has pioneered innovative programs to enhance the understanding and management of students' learning difficulties. Dr. Levine's comprehensive neurodevelopmental model draws on research from a wide range of disciplines. A renowned developmental-behavioral pediatrician, Dr. Levine is also Professor of Pediatrics at the University of North Carolina Medical School and Director of the University's Clinical Center for the Study of Development and Learning.

This unique, essential resource:

- ◆ offers practical, proven tools and strategies for academic and social success
- ◆ promotes fuller understanding of all your students' learning differences, including areas of strength as well as weakness
- ◆ explores the relationship between learning and key brain functions, like memory and attention, that impact a student's ability to succeed in school
- ◆ provides a Management-by-Profile process for addressing learning challenges, including:
  - understanding the learning issues (demystification)
  - developing accommodations and bypass strategies
  - intervening at the breakdown points
  - strengthening and building on strengths
  - protecting from humiliation
- ◆ 18 companion guides (approximately 20 pages each) provide valuable information including signs of problems, effective ways to work with your students, a summary of key ideas for each topic, resource recommendations, and more

*Presents complex concepts clearly, using actual classroom and home footage, and interviews with parents, teachers, and experts*

**Get the benefits of this successful approach for your students**

# Developing Minds Multimedia Library

*Real teachers, students, and parents managing real learning challenges at school and home*

The 22-video library explores the relationship between learning and key brain functions, and features practical, easy-to-use strategies to help students become more successful learners. The 18 accompanying print guides reinforce the concepts and strategies presented in the videos. Order the entire library to learn more about the full range of learning issues your students struggle with. Order the compiled sets below to address specific learning areas. Or, create your own collection of individual videos and companion guides.

### Theme Video and Guide Sets

*(40- to 60-minute videos, 16–20 page guides)* The theme videos present the learning challenges and successes of children, with a focus on specific subject or performance areas.

#### Theme Video Description

#### Related Video and Guide Set

**Getting Thoughts on Paper**—focuses on children's struggles to write

Set includes: Getting Thoughts on Paper, Attention, Neuromotor Function, Language, Memory, Higher Order Cognition, and 6 guides. \$149.95

**Thinking with Numbers**—highlights problems children face learning mathematics

Set includes: Thinking with Numbers, Memory, Language, Attention, Temporal-Sequential Ordering, Spatial Ordering, Higher Order Cognition, and 7 guides. \$174.95

**Mastering the Challenge of Reading**—explores key aspects of learning to read, such as decoding, comprehension, and reading retention

Set includes: Mastering the Challenge of Reading, Attention, Memory, Language, and 4 guides. \$99.95

**Understanding**—focuses on how children understand ideas and receive and process information

Set includes: Understanding, Memory, Attention, Language, Higher Order Cognition, and 5 guides. \$124.95

**Student Output: Producing, Performing, and Communicating**—focuses on how children communicate their thoughts—orally or in writing—or perform physical activities

Set includes: Student Output, Attention, Memory, Language, Neuromotor Function, Higher Order Cognition, and 6 guides. \$149.95

**Getting Organized/Work Habits**—looks at common organizational problems, including difficulty completing a task and managing time, materials, and space

Set includes: Getting Organized, Attention, Spatial Ordering, Temporal-Sequential Ordering, Memory, Higher Order Cognition, and 6 guides. \$149.95

**Feelings and Motivation**—explores school situations that may lead to humiliation, low self-esteem, loss of motivation, helplessness, anxiety, and withdrawal

Set includes: Feelings and Motivation, Attention, Memory, Language, Social Cognition, and 5 guides. \$124.95

**Behavioral Complications**—increases awareness of behavioral problems that may stem from a child's poor performance in school

Set includes: Behavioral Complications, Attention, Memory, Language, Social Cognition, and 5 guides. \$124.95

*Note that some of the compilation sets overlap and include some of the same videos and guides.*

## Construct Video and Guide Sets

(25- to 60-minute videos, 16–20 page guides) The construct videos provide deeper insight into specific neurodevelopmental breakdowns that contribute to learning problems.

### Construct Video Description

**Attention**—emphasizes children’s difficulties maintaining focus on a task, producing consistent work or effort, focusing on appropriate detail, and thinking ahead

**Language**—deepens understanding of children’s problems with language—when they listen or read, as well as communicate orally or through writing

**Memory**—highlights children’s abilities to take in, organize, and store information for later access

**Temporal-Sequential Ordering**—illustrates how children deal with time and sequences such as completing multi-step directions, remembering math procedures, and getting to school on time

**Spatial Ordering**—offers insights into how children manage information presented in a configuration or pattern, like completing a puzzle or organizing a locker

**Neuromotor Function**—explores gross motor abilities (large muscle movement and coordination) and graphomotor abilities (small muscle movement involved in the ability to write)

**Higher Order Cognition**—describes what’s involved in thinking at higher levels—analyzing information, understanding a new concept or idea, and problem solving

**Social Cognition**—highlights children’s ability to relate to others: communicate and act in socially acceptable ways, interpret others’ feelings, and develop positive relationships with key people in their lives
