

Hidden Cultures

Group 1

1 With your group, discuss and write down the environmental or geological conditions that you would need in order to keep a community of people hidden. Choose a location in the world that meets your conditions. Remember to keep your "secret" place to yourselves.

2 How would you protect this community from potential invaders?

3 When you are ready to begin, choose one person to answer questions from Group 2, but your whole group can discuss its responses before answering.

Group 2

1 With your group, list 20 questions that you will ask Group 1 in order to figure out where in the world its community is hidden.
