

# Coastline Measurements

Use the information you obtain from your coastline measurements to complete this worksheet.

|        | Size of Step (S) (in cm) | Measured Number of Steps (N) | Length (S x N) (in cm) |
|--------|--------------------------|------------------------------|------------------------|
| Test 1 |                          |                              |                        |
| Test 2 |                          |                              |                        |
| Test 3 |                          |                              |                        |
