

STUDENT WORKSHEET
COMPARING & CONTRASTING IMPACT

List all of the factors you have identified as contributors to children's education. In each of the sections below, on the top row next to "COUNTRIES," list each factor separately. For example, poverty might be the first, family need another, and so on. (You may add rows and columns to the grid.) Use + to indicate whether the factor has an impact in a country; use a dash where the factor is not a contributor. Note the common factors; note differences between developing and developed nations.

Factors

COUNTRIES							
Afghanistan
